

CSET	Domain	CSULB Biological Science Domain Courses	Accepted Coursework
Subtest II (217)	Domain 1: From Molecules to Organisms: Structures and Processes 1.1 Understand the structure and function of cells 1.2 Understand the hierarchical organization and functioning of systems in multicellular organisms 1.3 Understand growth and development of organisms 1.4 Understand matter and energy flow in organisms	<u>Take all the following:</u> BIOL 211: Intro to Evo and Diversity (5) BIOL 212: Intro to Cell and Molecular Biology (4) BIOL 213: Intro to Eco and Physiology (4) BIOL 340: Molecular Cell Bio (3) BIOL 342: Human Mammalian Physiology (3)	
	Domain 2: Ecosystems: Interactions, Energy, and Dynamics 2.1 Understand interdependent relationships in ecosystems 2.2 Understand c	<u>Take all the following:</u> BIOL 213: Intro to Eco and Physiology (4) BIOL 212: Intro to Cell and Molecular Biology (4)
