

Factors associated with Dietetic Interns' knowledge of sodium and the for Americans (DGA)

2015 Dietary Guidelines

Christine Gilbert, Gail Frank, DrPH, RD, CHES, Virginia Gray, PhD, RD, Selena Nguyen-Rodríguez, PhD
Department of Family & Consumer Sciences
College of Health & Human Services, California State University Long Beach

[†]Directors from CSULB, CSULB's ISPP, CSUP, UCSD, VAGLAHS, and PSH gave their permission to participate in the study and sent information to their Dietetic Interns. The majority of participants were female, 236 years old, and Caucasian.

[™]Professional Academia: This study indicated that Dietetic Interns may need more education on the DGA. Dietetic programs may be more likely to add competencies focusing on integration of DGA knowledge, especially in areas shown as lacking by this research.

[™]Dietetic Interns: Dietetic Interns may become aware of the DGA through their education and professional development.
