Figure 1. A schematic diagram of the experimental setup. The laser beam passes through a lens and a polarizer, and is focused onto the sample stage. The sample stage is mounted on a vibration isolator. The sample is held in a vacuum chamber.

10. The following table shows the number of hours worked by 1000 employees in a company.

The Catherinellae are easily distinguished from the other groups by the

fact that they have a single, well-defined, triangular lobe, which is often

very large, and which is often very large, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often

more or less triangular in shape, and which is often
