# 1.0 INTRODUCTION

## 1.1 <u>Preamble</u>

Students at CSULB earn highly valued degrees by completing at least two programs globes in de program (major) and CSULB's General Education (GE) Program. While the major focuses on discipline specific education and sometimes prepares students for specific professions, the GE Program teaches a

## 2.0 STRUCTURE OF THE GENERAL EDU**CROGR**AM

The GE Program is organized as three sequential stages.

- x The first is the Foundation: four courses designed to provide fundamental leastkillsg
- x The second is Explorationsine courses (except when a tenth course in laboratority is allowed as described in Section 3.2.2.1 below) distributed across the curriculum that are intended to provide an opportunity to explore the various way of acquiring and examining knowledge while continuing to develop learniskills.
- x The third is Upper-Division GE Courses: three courses designed to integrate/ledge and skills developed elizer in the curriculum.

In completing the Foundation, Explorations, and Upperision stages of the GE Program, all students must complete the distribution pattern described in Section 3.0 below. At the uppression level, students must take one threenit course each in Areas B, C, and D. These courses should be taken either at California State University, Long Beach or another California State University campus. In order to bring coherence to the UpperDivision GE Courses and the entire GE Programests may pursue a Concentration of courses (see below Section 5.0).

#### 2.1 Academic Preparation

All students are assessed for readiness for baccalauleated work in written communication in English and mathematics/quantitative reasoning. Students who havendnstrated a need for additional support in written communication in English and mathematics/quantitative reasoning will be placed in courses that provide such academic support, for instance through quaisites or stretch components, as mandated in CSE kecutive Order 1110 on Assessment of Academic Preparation (EO 1110).

2.2 Foundation

Courses must meet two sets of criteria: the general criteria for what constitutes a GE Candshe specific criteria for the Area or Subarea in which they are being certified.

### 3.1 GeneralCriteria

All courses in the GE Program must demonstrably encourage development of academic skills. GE Courses should include, as an integral component of **tegcts**ensitivity to different points of view and diverse learning methods.

When requesting GE certification for a certain Area or Subarea a course may be the only exposure a student gets to that Area or Subarea. The course as a whand not the general topic or discipline must be appropriate to that Area or Subarea and taught at the university level. Rather than GE being an afterthought to make a course fit into that Area or Subarea, with just perfunctory treatment or minimal coverage of the Area or Subarea, a course must be created around the concept of covering GE explicitly, directly, thoroughly, and significantly, integrating the Area or Subarea throughout the course. The course may simultaneously cover discipling the area or Subarea, however, that matel must be integrated with the GE content.

#### 3.2 LowerDivisionCourses

- 3.2.1 Area A, English Language Communication and Cilitizaking
- 3.2.1.1 Distribution

Students must complete nine units in Area A, English Language Communication and Critical Thinking (all courses at the lowedivision level), as follows:

- x Area A1: Three units chosen from approved courses in Communication.
- x Area A2: Three units chose of approved courses in Writte Communication.
- x Area A3: Three units chosen from approved courses in Ciritia king.

#### 3.2.1.2 Criteria

3.2.1.2.1 Criteria for Subareas A1, Oral Communication, and A2, W@tenmunication Courses in fulfillment of Subareas A1 and A2 wilettervstudents' knowledge and understanding of the form, content, context, and effectiveness of communication. Students will examine communication from the rhetorical perspective by practicing accuracy, reasoning, organization, and persuasion. Students wilhance their information literacy skills by developing their abilities to find, critically evaluate, organize, and report information, and by reading, writing, and listening effectively. Instruction will provide an understanding of the psychological basis and social significance of communication, including how communication operates in various situations.

3.2.1.2.1.1 Criteria for Subarea A1, Orabmmunication

Courses in fulfillment of Subarea A1 will develop students' proficiency in oral communication in English. Oursework

units.

- x Area B4: Three units chosen from approved courses in Mathematics/Quantitative Reasoning.
- x Area BUD: Three units chosen from any uppotentiation course in Area.
- 3.2.2.2 Criteria
- 3.2.2.2.1 Criteria for Subareas B1, Physical Science, B2, Life Science, and B3, Lacoutasery In Subareas B1, B2, and B3, students will develop knowledge of scientific theories, concepts, and data about both living and notiving systems. Students will achieve an understanding and appreciation of scientific principles and the scientific method. Fotential limits of scientific endeavors and the value systems and ethics associated with human inquiry may also be explored as appropriate for the course. Wherever appropriate, courses may address the influence that the acquisition of scientific knowledgas had on the development of the world's civilizations.
- 3.2.2.2.1.1 Criteria for Subarea B1, Physi**Sai**ence

contemporary dynamics of the American presidency, **Utmet**ed States Congress and the federal judiciary;

- x an introduction to constitutionally and legislatively established administr**ative** regulatoryinstitutions;
- x an analysis of bureaucracies and their impact on citizens at the national, state, and local levels;
- x an analysis of the US citizenry, including demography, political culture, public opinion and political

- 3.3.1 Courses requesting certification at the uppdivision level must meet the general criteria for GE Courses articulated in Section 3.1, the content criteria of at least one of the Subarealse and general upperdivision criteria for GE Courses articulated in theistign (3.3). However, these courses will only be categorized asJB, GUD, and D-UD.
- 3.3.2 Each UD GE category must offer courses intended for students without prior experience in the discipline beyond an introductory course. Uppday ision course may have prequisites that are not on the General Education Master Course List (i.e., discisptice if oprerequisites).
- 3.3.3 All courses approved for Area C at the upplikit \$\$(00) (6 56(10) 13.2 (1) 1028

To complete a Concentration, students must: 4.1.4 declare the
